*Based on PRELIMINARY data from the Vital Statistics System maintained by Vermont Department of Health and Monthly Service Report (MSR) data provided by the Department of Mental Health (DMH). Cross-sector data analysis was conducted using LinkPlus, a probabilistic statistical linkage software developed by the CDC for linking records across databases. MSR data includes services provided by community designated agencies for clients served by DAs within the year prior to death. Primary Program is defined as the primary program assignment on the client's last service with DMH. Monthly counts are subject to change as more information is made available.
